RTSA 2008 Eminent Speaker Andrew McCusker is the Operational Director of MTR Corporation Hong Kong, Chairman of NP360 Cable Car, Chairman of Telecoms provider TraxComm HK and a Board member of Octopus Ltd. HK.

In his twenty years in the Mass Transit Railway, Andrew has been responsible for major projects and renewals, maintenance, operations and as director of the rail business.

In each of these fields, he has achieved substantial service, safety and business improvements through leadership and innovation which has

positioned the MTR as the railway to be emulated in many aspects of rail transport.

He received recognition in Australia in 2007 when he was awarded the Steve Maxwell Leadership Award” and he has always maintained his interest in rail transport in Australia.

Andrew has been instrumental in moving Hong Kong rail from a traditional somewhat monopolistic approach to one focused on society and business needs. For MTR this has moved the company into a new era delivering sustainable profit from rail services and enhanced service delivery for customers at a very affordable price.

Apart from Railway, Andrew has significant senior industry experiences within Defense, Water, Gas and Power. He has covered Projects, Design, Operations and Maintenance in diverse environments in the United Kingdom, Middle East and Hong Kong.
