

Rail Industry Professional Development Event - Meet the Railway People

Rivers Edge Events, Docklands

The Meet the Railway People Expo has been in operation around the country since the first event in Melbourne in 2009.

Adopted by industry and students alike, this event gives the chance for students to meet face to face with members of the rail community and discuss careers in a frank and supportive environment.

Presentations by members of the rail workforce will be given, offering students a chance to learn from the experiences of those that have been in their shoes and taken a rail path.

Student Connections

Students from final year and third year undergraduate courses are encouraged to attend. A prospective career in rail is a career in a diverse and exciting arena, and Australia is the focus of the world at the moment.

Attending MTRP gives you the chance to enquire about upcoming opportunities, and build connections for a secure career with worldwide transferable skills.

Industry Involvement

Companies from industry are invited to attend, particularly those that offer graduate and vacation work in rail. Support your industry and capture a student audience to give your name university exposure and create connections with the technical specialists of tomorrow.
